Comfort for the Planet & People, Clivet answer to COP21

Climate change is happening now: temperatures are rising, rainfall patterns are shifting, glaciers and snow are melting, and the global mean sea level is rising. We expect that these changes will continue, and that extreme weather events resulting in hazards such as floods and droughts will become more frequent and intense. Impacts and vulnerabilities for nature, the economy and our health differ across regions, territories and economic sectors in Europe. It is very likely that most of the warming since the mid -20th century is due to the observed increase in greenhouse gas (GHG) concentrations as a result of emissions from human activities. The global temperature has risen by about 0.8 °C over the past 150 years, and is projected to increase further. Exceeding an increase of 2 °C above pre-industrial temperatures raises the risk of dangerous changes for global human and natural systems.

The international Paris Climate Conference, the 21st Conference of the Parties, known as COP21, has recognized the goal to limit the global mean temperature increase since pre-industrial times to below 2 °C.

How can we achieve this?

Starting from the presentation of Paolo Corazzon, meteorologist of 3B Meteo, on the current "climate" situation, and of Luca Stefanutti, author of several books on sustainable air conditioning, on the regulations in the air conditioning filed, the conference will present Clivet answer to the need to reduce greenhouse gas emissions.

Claudio Carano, Clivet Application Manager will present the Enhanced Hydronic System, the solution that allows to completely eliminate local CO₂ and combustion emissions and to cut down indirect CO₂ emissions by 30% compared to traditional air conditioning systems.

Guido Davoglio of Tekser design studio will show the results obtained from the use of the Enhanced Hydronic System in the redevelopment of a prestigious building in Milan, Palazzo Edison.

Programme

Fiera Milano-Rho, Room Gamma Pavilion 22 Mostra Convegno Expocomfort

Thursday, March 17th from 2.30 pm to 5.30 pm

- 14.15 Registration of the participants
- 14:30 Conference opening
- 14:45 Global Warming and COP21 - Paolo Corazzon, 3B Meteo
- 15:15 Laws and regulations for sustainable air conditioning - Luca Stefanutti, BMZ Impianti
- 15:45 Clivet Enhanced Hydronic System - Claudio Carano, Clivet
- 16:15 Piazza Edison Milan: a 0 impact redevelopment - Guido Davoglio, Tekser
- 16:45 Discussion and conclusions

Subscription

The participation to conference is free, filling in the application form and sending it by fax to +39 0439 313300 or by e-mail to documentazione.marketing@clivet.it
